

Vocabulary Words

Theme 6—Lesson 29

The Planets

1. distinct - When there are several similar but separate objects, the objects are said to be distinct.
2. slightly - When something happens slightly, you can barely tell it happened.
3. infinite - When there is so much of something that it cannot be measured, it is infinite.
4. expansive - Something that is expansive covers a very large area.
5. rotate - Something that rotates spins like a top.
6. steady - A light that is steady always looks the same and does not change or go out.
7. reflect - When something reflects light, the light bounces off the surface instead of passing through it.
8. surface - The surface of something is the top part of it.
9. evidence - Evidence is proof that something has happened.
10. appear - How something appears is the way it looks or seems to be.
